About This Document

A specialized research paper on phosphate fertilizers covering their types, sources, and application methods to improve crop productivity.

Topics covered:

- Triple Superphosphate (TSP) - 46% P₂O₅
- Single Superphosphate (SSP) - 18% P₂O₅
- Diammonium Phosphate (DAP) - 18-46-0
- Soil pH effects on phosphorus availability
- Root development and phosphorus
- Application methods and timing

Keywords:

Superphosphate

Phosphorus

Roots

Soil
